# Vaginal dryness, itching and burning?

Now there's  
something you  
can do about it that  
really works.

When estrogen levels decline after menopause, many changes occur. Millions of women experience symptoms such as vaginal dryness, itching, burning or painful intercourse as a consequence of these changes. Many women suffer silently, and those who seek treatment find their options limited: messy estrogen creams or hormone replacement therapy, which isn't for everyone.

**Now there's a better way.**

MonaLisa Touch™

MonaLisa Touch: fast, simple and safe

**MonaLisa Touch laser treatment is a simple procedure that takes less than 5 minutes.**

It delivers both immediate and long-lasting relief. And it's clinically proven to really work.

- Simple, painless laser energy
- In-office, no anesthesia
- No side effects
- No downtime
- Symptom relief after just one treatment
- Thousands of women successfully treated since 2008

A new procedure that patients have called "life-changing"

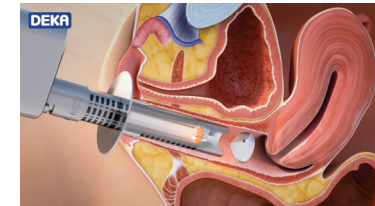

MonaLisa Touch delivers gentle laser energy to the vaginal wall that stimulates a healing response and enhanced moisture levels in the vaginal canal. A typical course of treatment is three procedures over 12 weeks.

Many women report symptom relief after the very first treatment and even greater improvement after treatments 2 and 3.

## Q & A

**Q: What happens during treatment?**

**A:** The procedure will seem similar to your annual exam, and will likely be even quicker. Your healthcare provider will insert the laser tip into your vagina and deliver laser energy "pulses." The total procedure time is less than 5 minutes.

**Q: Does it hurt?**

**A:** The laser energy itself is painless. Some patients report mild discomfort with the laser tip insertion during the first procedure due to vaginal dryness.

**Q: How soon can I expect results?**

**A:** Many patients have reported that they experience relief right away. Virtually all patients have experienced relief by the second treatment, or week 6.

**Q: How long does treatment last?**

**A:** MonaLisa Touch provides long-lasting results. A once-a-year single treatment is recommended to maintain symptom relief. This can be done quickly and conveniently during your annual checkup.

MonaLisa Touch helps  
restore vaginal health.  
That's something to talk about.
